

WE BUY BACK YOUR USED DOLLIES!

Don't invest in time consuming,
tricky repairs...

Super Panther dollies were excellent dollies at their time but meanwhile we added a lot of value to our dollies. Take the Classic for instance, it offers:

- fortified body
- software upgrade allowing limits and column travel in a specified range
- reinforced connectors in the handset cable and blue alloy rocker
- H wheels with robust disc brakes which run a full circle of 3m inner diameter
- standard rotatable Euro Mount
- additional noise reduction through new motor
- balljoint suspended gas springs avoid unwanted tension and guarantee improved life span and running smoothness of the column
- newly improved Combi Charger and more powerful batteries

We are very interested that dolly grips and cameraman will profit of these advantages. That is why we offer to trade in your used equipment against new, state of the art Classic dollies!

If your rental outlet shines brand new, new customers are easily attracted!
